

REPORT FOR VEHICLE MANAGEMENT SYSTEM

1 INTRODUCTION

1.1 Overview

The Vehicle Management System (VMS) is an application for the Automotive industry. It supports, in the area of Sales & Services, the business processes that you require as vehicle importer when dealing with your original equipment manufacturers (OEMs) and your dealers in new and used vehicle sales.

1.2 Purpose

A vehicle management system is a software system or platform that serves to manage commercial fleets of vehicles, such as cars, vans or trucks or even heavy equipment to ensure they're utilized safely, efficiently and professionally, while making sure they're well maintained and high-performing.

2 Problem Definition & Design Thinking

2.1 Empathy Map

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

Build empathy

The information you add here should be representative of the observations and research you've done about your users.

2.2 Ideation & Brainstorming

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 15 minutes to complete
- 1 hour to collaborate
- 24 people recommended

More template feedback

Before you collaborate

1. Get a list of participants given a thing they want to do. Share it with your team.

2. Team gathering

3. Set the goal

4. Learn how to use the facilitation tools

Define your problem statement

What problem are you trying to solve? Frame your problem as a "How Might We" statement. This will be the focus of your brainstorming.

How might we (your problem statement)?

Key rules of brainstorming

- Stay in topic
- Encourage wild ideas
- One idea at a time
- Don't judge
- Go for quantity
- 4 people, 15 minutes

Brainstorming

Person 1

- proper service and drive this car.
- Good Mollage this vehicle
- Maintain the speed of the vehicle
- First check petrol this vehicle.
- Regularly washed car
- Regularly covered a car in rain days.

Person 2

- Car parked the suitable place.
- Good driving and Maintaining drivers safety
- Comfortable riding the car.
- Check the condition of the tires.
- Tracking vehicles.

Person 3

- Reducing Fuel

Person 4

Group ideas

Take turns sharing your ideas while clustering similar or related ideas as you go. Share all ideas, no matter how small. Give each idea a sticky note. If a cluster is larger than the sticky notes, try and use it as a guide to cluster the ideas.

15 minutes

TIP

Add customer-like tags to sticky notes to make it easier to find, remove, organize, and categorize important ideas as they emerge within your cluster.

Prioritize

Now group ideas that all do the same thing about what's important. Group ideas that all do the same thing about what's important. Group ideas that all do the same thing about what's important.

15 minutes

Importance

Feasibility

After you collaborate

Now group ideas that all do the same thing about what's important. Group ideas that all do the same thing about what's important. Group ideas that all do the same thing about what's important.

15 minutes

Group, sharing feedback

- 1. Group ideas that all do the same thing about what's important.
- 2. Group ideas that all do the same thing about what's important.
- 3. Group ideas that all do the same thing about what's important.

3 RESULT

3.1 Data Model:

Object Name	Fields in the Object	
Vehicles object	Field label	datatype
	Customer Name	Text
	Customer Mobile No	Number
	Vehicle Type i)2 wheeler ii)4 wheeler	Picklist
	Vehicle Name	Text
Driver objects	Field label	datatype
	Driver Name	Text
	Licence no	Text
	Mobile no	Number
	Fair Per Hour	Text
	Vehicle	Lookup(Vehicle)

Milestone-2:Object

Activity 1:

To Create vehicle object:

SETUP
New Custom Object

Optional Features

- ☒ Allow Reports
- ☐ Allow Activities
- ☐ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access

Deployment Status

☐ In Development
☒ Deployed

Search Status

When this setting is enabled, your users can find records of this object type when they search. [Learn more.](#)

- ☒ Allow Search

Object Creation Options (Available only when custom object is first created)

- ☐ Add Notes and Attachments related list to default page layout
- ☐ Launch New Custom Tab Wizard after saving this custom object

Save Save & New Cancel

Activity 2:

To create Driver object

To Create a driver object continue the same steps Which is followed for the above object.

Milestone -3:Fields and Relationship

Activity-1 :

Creation of fields

SETUP > OBJECT MANAGER

New Custom Field

Step 2. Enter the details

Field Label: 

Please enter the maximum length for a text field below:

Length:

Field Name: 

Description:

Help Text: 

Required: ☐ Always require a value in this field in order to save a record

Unique: ☐ Do not allow duplicate values

☐ Treat "ABC" and "abc" as duplicate values (case insensitive)

☐ Treat "ABC" and "abc" as different values (case sensitive)

External ID: ☐ Set this field as the unique record identifier from an external system

Auto add to custom report type: ☒ Add this field to existing custom report types that contain this entity 

Default Value:

Use formula syntax. Enclose text and picklist value API names in double quotes ("No text", include numbers without quotes). To reference a field from a Custom Metadata type record use: \$CustomMetadata.Type__mdt.RecordIDNameField__c

The screenshot shows the Salesforce Setup interface. In the top navigation bar, the 'Users' button is highlighted. In the left sidebar, the 'Users' link is highlighted. The main content area displays the 'All Users' page, which includes a table of users and buttons for 'New User', 'Reset Password(s)', and 'Add Multiple Users'. Red arrows indicate the navigation path from the 'Users' link in the sidebar to the 'Users' button in the top navigation bar, and then to the 'All Users' section header.

5 ADVANTAGES & DISADVANTAGE

- ➡ It improves productivity by saving delivery time due to use of advance route information, traffic alerts etc.
- ➡ It helps to reduce cost of fuel.

- ➡It ensures safety of vehicles, drivers and goods. Active tracking based fleet management requires monthly subscription charges and data usage charges.
- ➡It is difficult to manage and maintain fleet management system due to use of multiple technologies such as cloud servers, cellular wireless systems, fleet management software etc.

6 Applications

- Improve fleet safety and working conditions
- Improve the behavior and performance of drivers and bear unsafe driving.
- Schedule shifts and work hours.
- Leverage driver retention.
- Schedule routine maintenance.

7 CONCLUSION

Our project is only a humble venture to satisfy the needs to manage their project work. This package shall prove to be a powerful package in satisfying all the requirements of the College. The objective of software planning is to provide a frame work that enables the manager to make reasonable estimates made within a limited time frame at the beginning of the software project and should be updated regularly as the project progresses.

8 FUTURE SCOPE

Vehicle Management System is a windows application written for 32 bit Windows operating systems. Which focused in the area of adding, editing and deleting the passengers, staff and the bus routes in this software a person can be register as a user and he can manage the bus routes and the staff passengers.
